

The second annual Bristol Algorithms Days will gather researchers interested in the study of theoretical and applied aspects of algorithms. This interdisciplinary workshop will consider work at the boundaries of Computer Science, Mathematical Sciences and Engineering. The aim is to initiate new research collaboration, and is aimed at academics, research students and industrialists.

Topics will include (but are not limited to):

- Combinatorial Pattern Matching
- Complexity Theory
- Approximation Algorithms
- Randomised Algorithms
- Graph Theory
- Probabilistic Analysis
- Game Theory
- Quantum Computing

Bristol Algorithms Days

2-4 March 2008

Dept. of Computer Science

Registration

The closing date for registration is 4th January 2008. Registration is free but as numbers are limited, we will contact you shortly after the deadline to let you know if your application has been successful. Please email Kerrie.Walker@bristol.ac.uk with the subject "BAD 08" and include your name, affiliation, professional position, address and which dates you will be arriving and leaving from Bristol. If you would like to apply for help with the costs of travelling to and from Bristol please also let us know at this point.

bridging the gaps
