Studentships for Computer Science and Electronics students

Thank you for applying to the Computer Science and Electronics course here at Bristol. I am writing to you to let you know about the comprehensive studentship programme we have here for new students.

We are fortunate to host a Centre of Excellence in Microelectronics here in the department. The centre coordinates a programme of involvement from local industry, intended to benefit the students on our courses. Of particular interest to many of our local companies are students following our Computer Science and Electronics programme.

This involvement includes providing support and advice to our undergraduate students, offering summer projects and company placements and also offering studentships to students enrolled on the programme.

This year, we are also delighted to announce that, due to generous contributions from Icera and XMOS, we will be able to offer eight studentships of £1,000 to students beginning our Computer Science and Electronics programme.

If you would like to apply for one of these studentships and intend to confirm your place at Bristol, please send a short personal statement to myself at the address above before 17st May 2009. Your statement should explain why you think you would benefit from receiving a studentship from the Centre. You may wish to emphasise how you think an interaction with local industry would aid you in your studies.

I wish you the best of luck in your future studies,

Dr Simon Hollis
Assistant Programme Director, Computer Science and Electronics
