

"HMS Beagle at Tierra del Fuego, by Conrad Martens
From *The Illustrated Origin of Species*"

MMEE 2009 will have a Darwinian flavour, in honour of the bicentenary of Darwin's birth, and 150 years since the publication of *The Origin of Species*. While not a mathematician himself, Darwin's ideas find natural expression in the form of mathematical models, allowing further development and refinement of the theory. This two-day meeting will showcase the latest developments of formal models in evolution and ecology, and will include keynote addresses on the mathematical modelling of Darwin's key theories and insights.

Keynote Speakers

- Professor Rob Boyd, Department of Anthropology, University of California Los Angeles
- Professor Alan Grafen, Department of Zoology, University of Oxford
- Professor Hanna Kokko, Department of Biological and Environmental Science, University of Helsinki
- Professor Franjo Weissing, Department of Biology, University of Groningen

Abstract Submission

Abstracts of less than 250 words should be submitted via email to James.Marshall@bristol.ac.uk, by June 12th 2009. The organisers welcome abstracts for talks and posters (please indicate your preference if you have one).

Registration

Places are limited so we encourage early registration. Registration will close on July 10th 2009. Registration costs 50 GBP for standard delegates, to include lunches, coffee breaks and conference reception. 40 free places are available for postgraduate students on a first-come-first-served basis. Please visit the conference website for details on how to register.

Accommodation

Accommodation at discount rates has been arranged with local hotels. Rooms in student halls are also available. Please visit the conference website for more details.

Mathematical Models in Ecology & Evolution 2009

September 10th-11th 2009

University of Bristol

Chairs:

James Marshall, John McNamara,
Alasdair Houston
